Three Decades of Delivering Excellence

With our extensive experience in the natural stone industry, we bring a wealth of knowledge and expertise to every project. We intimately understand the nuances of this versatile material, and our commitment to investing in cutting-edge machinery means we have the tools to bring your vision to fruition.

Our deep understanding of design, stone capabilities, and practical applications allows us to seamlessly marry your creative ideas with the possibilities and potential of the various stones at our disposal.

Stable sourcing from over **250** quarries

Seamless processing in **4** factories

Export over **33,00,000** sq.m per year

Impact on over **10,000** people

Largest manufacturer of sandstone and limestone products

Inspired by Innovation

At Xpereos, we believe that pushing the boundaries of what is possible with natural stone allows us to create truly unique and stunning designs for our customers.

Our relentless pursuit of innovation is reflected in our investment in state-of-the-art machinery and equipment, as well as in the skill and expertise of our team. We understand that to stay at the forefront of the industry, we must constantly evolve and adapt to new technologies and techniques.

Sawing Capacity of **2,50,000 sq. m per annum**

State-of-the-art **cutting and finishing machines** to ensure precision and quality

Forced hot air treatment plant for eco-friendly fumigation of timber for our crates

Natural Stone

Each piece of stone is a one-of-a-kind work of art, crafted by the earth over countless eons. We take pride in bringing this natural beauty to your living spaces, whether it's for a residential or commercial application.

We understand that natural stone is not just a building material, it's a medium for self-expression. That's why we offer a wide range of natural stones, from classic sandstones to hardy granites, and custom-finishes to match your specific design needs.

Quartzite

Limestone

Granite

Quartzite

One of the strongest natural stones on earth

A natural stone with unique characteristics and unparalleled beauty, is the perfect choice for those seeking to add a touch of luxury to their living spaces. Its durable properties and resistance to wear and tear make it a practical choice for flooring, walling, countertops, or even for creating bespoke features. With its ability to withstand extreme temperatures and weather conditions, quartzite is also a great option for outdoor spaces.

Features

Composed primarily of sand-sized grains of quartz, cemented together with silica and other minerals.

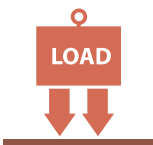

High density

Resistant to harsh weathering

Unique texture

High compressive strength

Low porosity

Usage of Quartzite

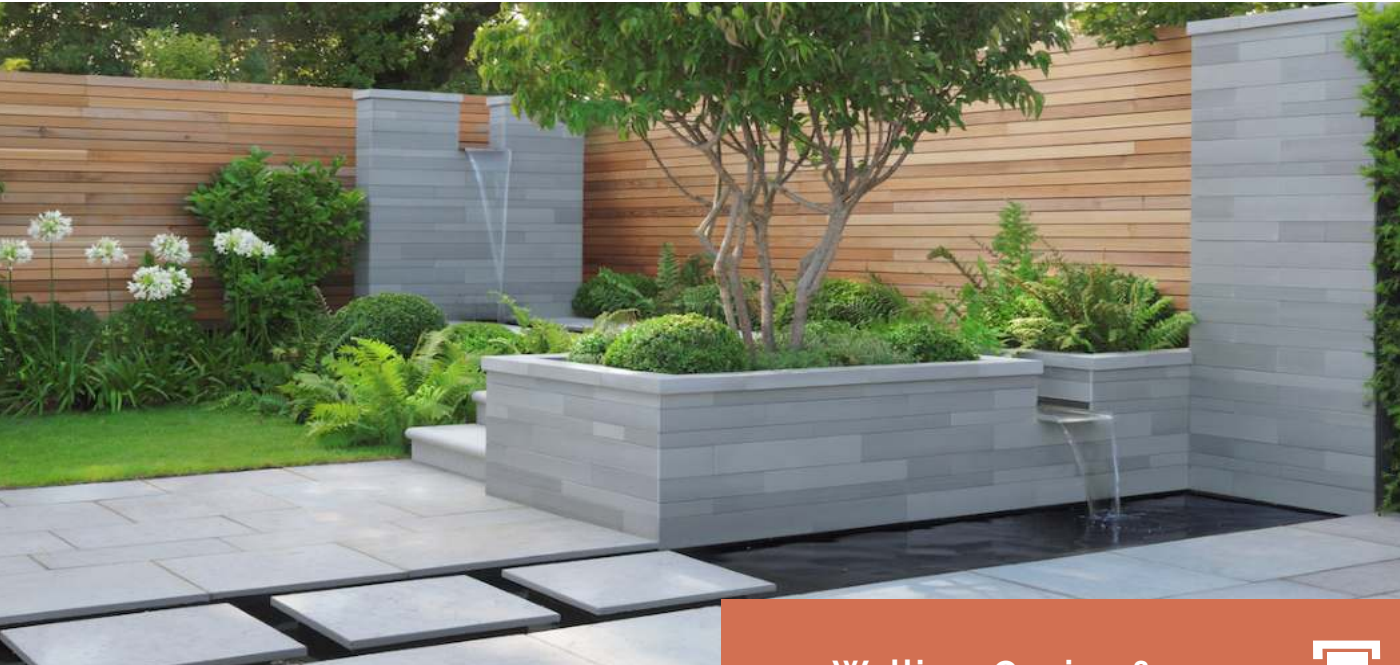

Quartzite's resilience and durability make it the perfect choice for hard landscaping projects such as driveways, patios, and garden paths.

Its natural beauty and strength also lend itself to unique architectural designs, such as cladding facades and walls, staircases, swimming pool edges, garden furniture, and ornamental carvings.

Limestone

Brings incredible versatility to spaces

Limestone is a natural stone that evokes warmth and elegance, making it a popular choice for both residential and commercial projects. It's soft, neutral hues and subtle variations in colour and texture make it versatile and timeless. Formed over millions of years from the accumulation of shells, coral and other marine life, limestone is known for its durability and resistance to weathering.

Features

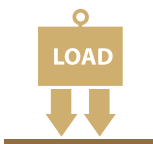

A sedimentary rock composed primarily of calcium carbonate, often in the form of the minerals calcite or aragonite.

High density

Resistant to harsh weathering

High compressive strength

Low porosity

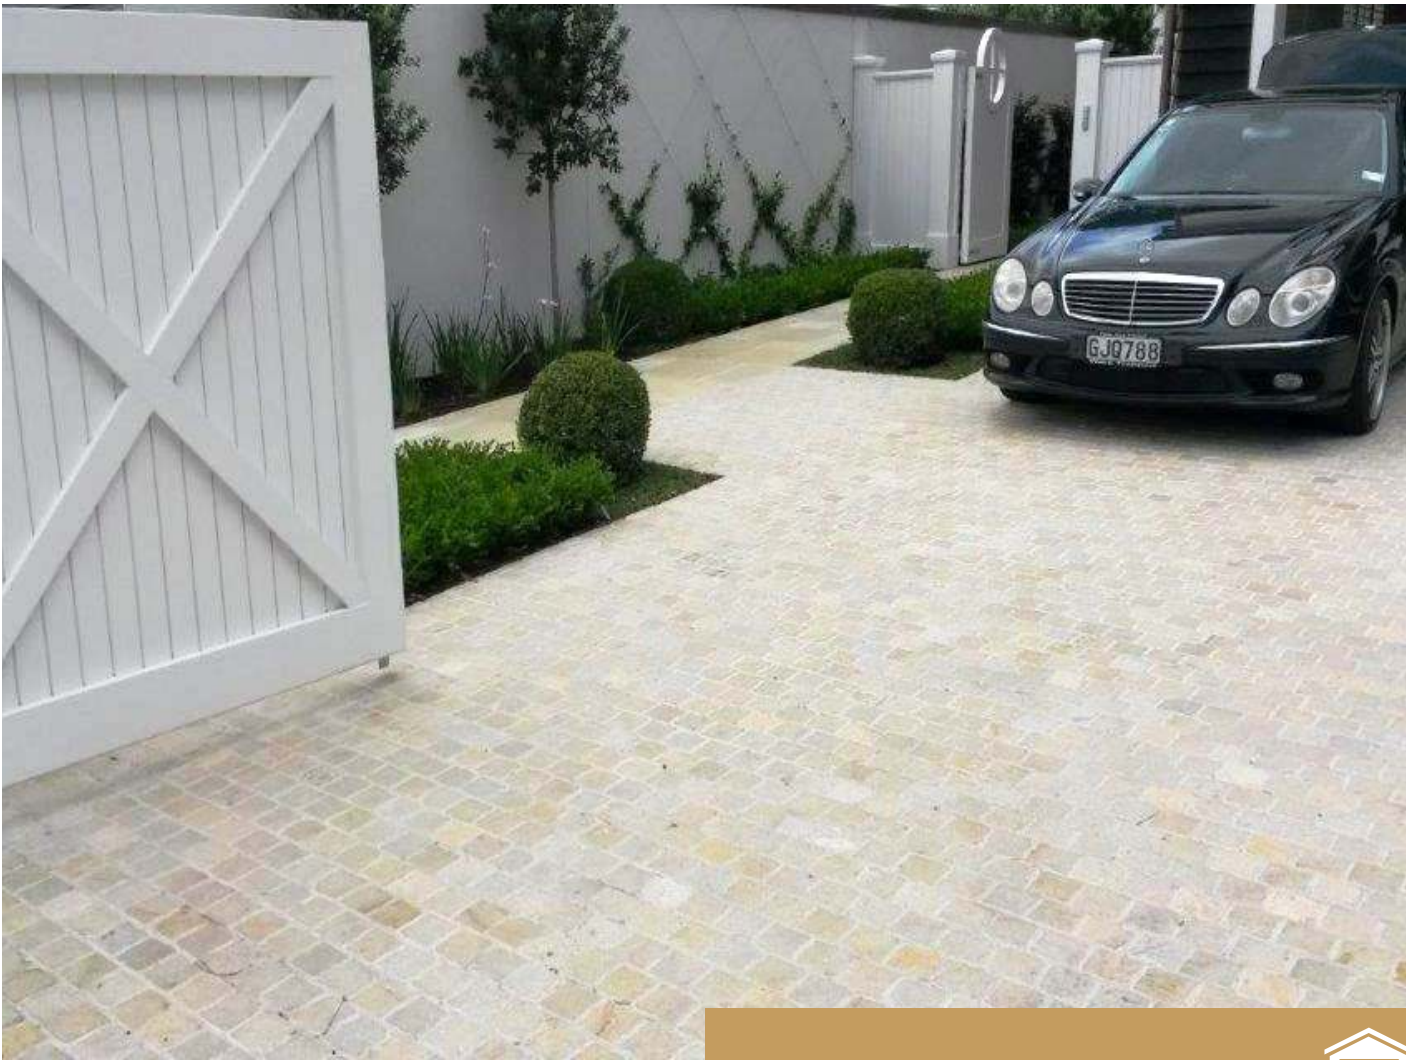

Usage of Limestone

The natural hues and textures of limestone make it a perfect fit for creating enchanting living spaces. Driveways, patios, and walkways, all come alive with the timeless elegance of limestone paving. It is an incredibly durable stone and able to withstand heavy foot traffic.

Granite

Creates compelling home accents and features

Significantly hard and durable, granite is an igneous rock formed by the solidification of magma deep below the earth's surface. Its unique composition of coarse-grained quartz and feldspars not only adds to its strength and durability, but also gives it a stunning range of colors. Its ability to withstand various weather conditions makes it a perfect choice for both indoor and outdoor construction projects. Granite tiles and slabs are often used as countertops, flooring and stair treads, providing an elegant and timeless touch to any space.

Features

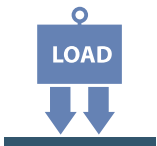

Granite is an igneous rock of breathtaking beauty, composed of the finest grains of quartz and feldspar.

Looking for Assistance? Our team is here to help you

Easily navigate the process of order placement after feasibility and selection of stones with our team, to ensure timely and error-free delivery.

1. Where do you start when placing an order?

We understand that every project is unique. That's why we offer flexible support, whether you need us from the very beginning of your design process or even after the stone has already been specified. Our team is always ready to provide valuable technical information and product samples.

2. Can I order custom sizes?

Our inhouse CNC team has the ability to interpret and create complex 3D designs to bring your vision to life. We offer expert advice on natural stones and their usage to ensure the best solution for your project.

3. Is there availability through the year?

We are prepared to meet your natural stone needs year-round, even during the monsoon season when active quarrying is temporarily suspended. Our extensive stocking capacity ensures that we can continue to provide timely deliveries and meet your project demands.

4. Is there colour consistency in one order?

All of our natural stones have their own unique character, which includes inherent variations in color and texture. While we exercise stringent quality control measures at our quarries and monitor the color of each shipment, it is important to note that uniformity is not always possible due to the natural origin of the stone. These captivating variations are a testament to the authenticity and beauty of the material.

5. What is the packaging process?

We take great care in ensuring the safe delivery of our products, using either wooden pallets or crates for packaging and foam reinforcements to secure the stones in transit. Every dispatch is meticulously labeled, documented and photographed for your reference.

6. What are the delivery timelines within India?

The delivery timeline will depend on the size of your order. For smaller orders, please allow for 2-4 weeks from the date of placement. Our team will work to ensure a prompt and efficient process, keeping you informed every step of the way.

At Xpereos, we invest in the latest technology and innovation to uphold the promise of taking your creative vision to life.

Transform Living Spaces

Unleash your creativity with the vibrant hues and unique compositions of Xpereos natural stone, the perfect building blocks for your artistic vision.
